RECEIVED  
MAY 28 1986

DEPARTMENT OF ECOLOGY  
NORTHWEST REGION

Dear Ms. Dorigan,

I am writing this letter to provide additional confirmation of the pollution sighted by Lee Moyer on the evening of May 22. I was participating as a "support kayak" during the outing of his Introduction to Sea Kayaking class on the Duwamish (and therefore do not appear on the class roster.) I observed the water with suspended particulates being dumped into the river, and can testify that Lee did take pictures and speak to a worker at that time. If you would like more details, please let me know. If the addition of credentials add any credibility to my statement, I have a Masters degree from the University of Minnesota in Geology with a minor in Ecology .

Sincerely,

*Terrill Burch*
